DETAILED ACTION

The amendment filed October 17, 2005 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Claim Objections

1. Claim 6 is objected to because of the following informalities: claim 6 depends from claim 2 which has been cancelled. For the purposes of applying prior art to the rejections set forth below, it has been assumed that claim 6 depends from claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6, 8, and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Dunn et al. (4,606,569).

The Dunn et al. patent shows a food grasping tool comprising first (15) and second (19) apertured container members capable of containing a cookie therebetween and capable of inserting this cookie within a certain sized vessel. The bottom surface or "support wall" of each container member is deemed to be "generally" disc-shaped.

3. Claims 1, 6, 8, 9, 11, 12, 15, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Andrews (1,487,909).

Andrews shows a doughnut holder comprising a pair of similarly shaped container members (10) and (18,19) and a handle member (20) that is adapted to be manipulated to cause these container members to open or remain closed.

4. Claims 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Price (818,465).

Price shows two similarly shaped container members (4) having openings (5) through their support walls.

5. Claims 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyd (3,964,775).

Boyd shows a pair of container members (12,14) each having an apertured support wall (see Fig. 3) and a transverse wall (18,54) with apertures between abutting tines (60,52) when in a closed position.

Allowable Subject Matter

6. Claims 10 and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
